4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THE CERTIFICATE

The work of paper hangers and floor layers consists primarily of selecting materials based on the relevant conditions, their unique qualities and the wishes of the customer, precise preparatory work, such as cleaning and repairing a work surface, and the completion of the work through the laying of the relevant wall or floor materials. This trade sector incorporates most things that are affixed with glue into human dwellings, such as wallpaper, decorative bands, canvas, and other materials placed on ceilings and walls. Paper hangers and floor layers also lay carpets, linoleum and floor tiles, as well as various soundproofing materials. An important part of the trade is the laying of floor and wall materials in wet rooms, e.g. bathrooms and industrial premises. Some paper hangers and floor layers specialise in laying artificial surfaces on sports fields, in sports stadiums, swimming pools and on roofs. Authorised to work as paper hangers and floor layers are those who have earned a journeyman's certificate in paper hanging and floor laying, issued by the Minister of Industry and Trade.
